ANEXO 01

CARACTERIZAÇÃO DO STPP/RMR

Apresentação

Este anexo é parte integrante da licitação nº 003/2013, que trata sobre a seleção de empresas para operar os Serviços do Sistema de Transporte Público de Passageiros da Região Metropolitana do Recife-STPP/RMR, agrupados em Lotes de Linhas.

Tem como objetivo traduzir para os licitantes o funcionamento do STPP/RMR, o contexto em que está inserido, além de detalhar o serviço que está sendo licitado para cada linha por lote.

Neste documento estão contidas as Caracterizações da Região Metropolitana do Recife e do STPP/RMR e no Anexo 2 estão descritas as Especificações Técnicas dos Lotes, compreendendo o detalhamento das caracterizações comuns a todos os lotes e aquelas que se referem exclusivamente a cada lote.

1.0 – Descrição da Região Metropolitana do Recife

A Região Metropolitana do Recife foi instituída pela Lei Complementar nº 14 de agosto de 1973 e redefinida através da Lei Complementar Estadual nº 10 de 08.01.94, com vistas à organização, planejamento e à execução de funções públicas de interesse comum.

A Região Metropolitana do Recife - RMR está localizada na zona da mata e litoral de Pernambuco ocupando uma área de 2.768 km², correspondente a aproximadamente 2,8% da área total do Estado. Com uma população de 3.688.428 habitantes (Censo IBGE 2010) é a quinta maior área metropolitana do Brasil no tocante à população, ficando abaixo de São Paulo, Rio de Janeiro, Belo Horizonte e Porto Alegre.

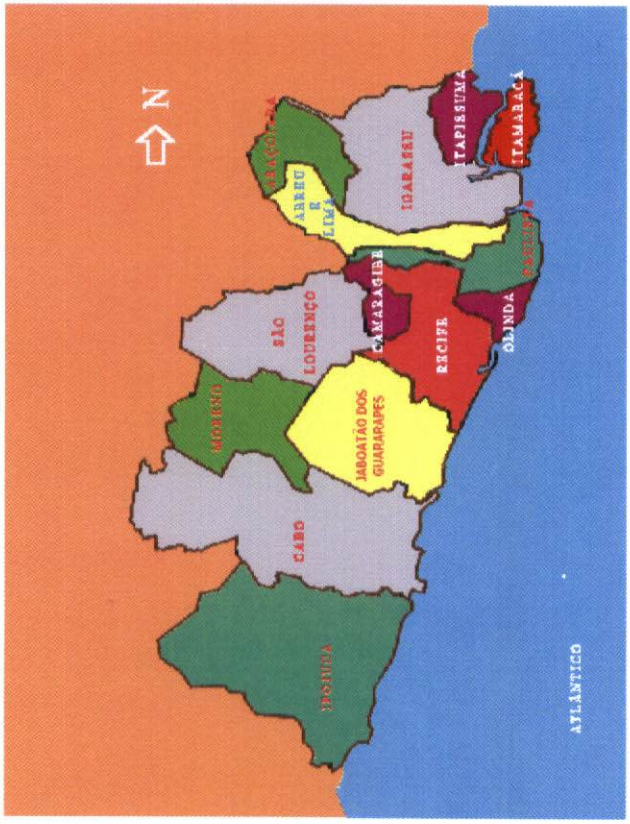

1.1 - Municípios Integrantes

Integram a RMR os municípios de Abreu e Lima, Araçoiaba, Cabo de Santo Agostinho, Camaragibe, Igarassu, Ipojuca, Ilha de Itamaracá, Itapissuma, Jaboatão dos Guararapes, Moreno, Olinda, Paulista, Recife e São Lourenço da Mata (fig. 1). Os 14 municípios metropolitanos podem ser agrupados pela sua distribuição geográfica em quatro áreas:

- Área Centro: Recife, Olinda e Jaboatão dos Guararapes;
- Área Norte: Paulista, Abreu e Lima, Igarassu, Itamaracá, Itapissuma e Araçoiaba;
- Área Oeste: Camaragibe, São Lourenço da Mata e Moreno; e
- Área Sul: Cabo de Santo Agostinho e Ipojuca.

Maria Ivana Vanderlei
Mat. 275

FIGURA 1: REGIÃO METROPOLITANA DO RECIFE

1.2 - População e Área

No período de 2000 a 2010 a RMR apresentou um crescimento populacional de 10,58 %, de acordo com os dados do Instituto Brasileiro de Geografia e Estatística do Brasil – IBGE, detalhados no Quadro 1: Evolução da População da RMR. Constata-se que na maioria dos municípios a tendência de crescimento populacional é maior do que no Recife, caracterizando cada vez mais a "cidade metropolitana".

Com relação à distribuição do contingente populacional da RMR, 78% da sua população total está concentrada em apenas quatro municípios, Recife, Olinda, Jaboatão dos Guararapes e Paulista. Tais municípios apresentam uma grande conurbação, cujos limites caracterizam-se pela inexistência de interstícios e homogeneidade na ocupação do solo, não sendo perceptíveis para os habitantes desta região esses limites.

Em termos de densidade a RMR apresenta em 2010 um total de 1.330 hab./ km² e o Recife possui uma densidade demográfica de 7.037 hab./ km² devido a sua pequena área territorial de 218,5 km². Estes resultados refletem a concentração nos municípios da área central da RMR, em especial a capital do Estado. A população, área e densidade populacional de cada município da RMR são apresentadas a seguir no Quadro 2: Densidade Populacional da RMR.

QUADRO 1: EVOLUÇÃO DA POPULAÇÃO NA RMR

MUNICÍPIO	POPULAÇÃO		% CRESCIMENTO
	2000	2010	2010/2000
Abreu e Lima	89.039	94.429	6,05
Araçoiaba	15.108	18.156	20,17
Cabo de Santo Agostinho	152.977	185.025	20,95
Camaragibe	128.701	144.466	12,25
Igarassu	82.278	102.021	24,00
Ipojuca	59.281	80.637	36,03

1.3 - Atividades Econômicas

A RMR tem se consolidado como importante centro de atividades comerciais e de serviços, com destaque para sua capital e apresenta-se também como um relevante centro cultural e turístico. Ela conta com importantes atividades industriais e com grandes expectativas de crescimento, por exemplo: na área Sul os empreendimentos do Complexo Industrial e Portuário de SUAPE, na área oeste o desenvolvimento está sendo incentivado com a implantação da Cidade da Copa e na área norte com a implantação do pólo automotivo, farmacoquímico e de hemoderivados, além do turismo no Município de Itamaracá.

A área central da Região tem se destacado nos chamados serviços modernos e turísticos. O Recife concentra setores dinâmicos constituídos pelos serviços médicos e associados, pelo segmento do turismo nas vertentes cultural, de negócios e de lazer (sol e mar), pelas atividades relacionadas com a informática, assim como a de consultorias técnicas e a de formação de mão de obra especializada, tanto de nível médio quanto superior. O Município de Olinda, "Cidade Cultural" e "Patrimônio da Humanidade", destaca-se com sua área histórica com grandes perspectivas de exploração turística. O Município de Jaboatão dos Guararapes detém a terceira maior arrecadação e caracteriza-se por sua diversidade econômica e social. Possui um distrito industrial, áreas rurais e ao mesmo tempo um comércio bastante intenso.

Os municípios do Cabo de Santo Agostinho e o de Ipojuca ficam localizados no Sul da RMR, onde está situado o Complexo Industrial e Portuário de SUAPE-CIAPS. Estão sendo implantados, nesta região, grandes investimentos, como a refinaria de petróleo Abreu e Lima, a construção do estaleiro do grupo Camargo Corrêa, que será o maior do Hemisfério Sul e um Pólo de Poliéster do grupo italiano Mossi Ghisolfi (M&G). Esses empreendimentos estão "alavancando" novos investimentos para a região, mudando completamente a sua economia e acelerando o seu desenvolvimento, principalmente nos municípios vizinhos ao complexo.

Os municípios do Cabo e Ipojuca destacam-se como importantes polos turísticos, principalmente pelas suas belas praias e pela sua infraestrutura hoteleira.

Os municípios da área Norte da RMR apresentam-se como polos industriais e turísticos, com áreas de preservação histórica, ambiental e praias. Destacam-se também alguns conjuntos habitacionais e grandes espaços vazios com tendências de crescimento. Está previsto para esta área um grande pólo de lazer e turístico a partir da saída das penitenciárias do Município de Itamaracá e a instalação da indústria automobilística da Fiat.

A parte Oeste da RMR caracteriza-se por ter áreas rurais, industriais, conjuntos habitacionais e comércios locais. Nesta área, além da Arena Pernambuco está sendo implantada a Cidade da Copa com 9.000 unidades habitacionais e empresariais, o campus educacional da UPE e outros serviços que propiciarão um desenvolvimento acelerado à região.

Maria Ivana Vanderlei
Mat. 275

1.4 - Divisão Modal

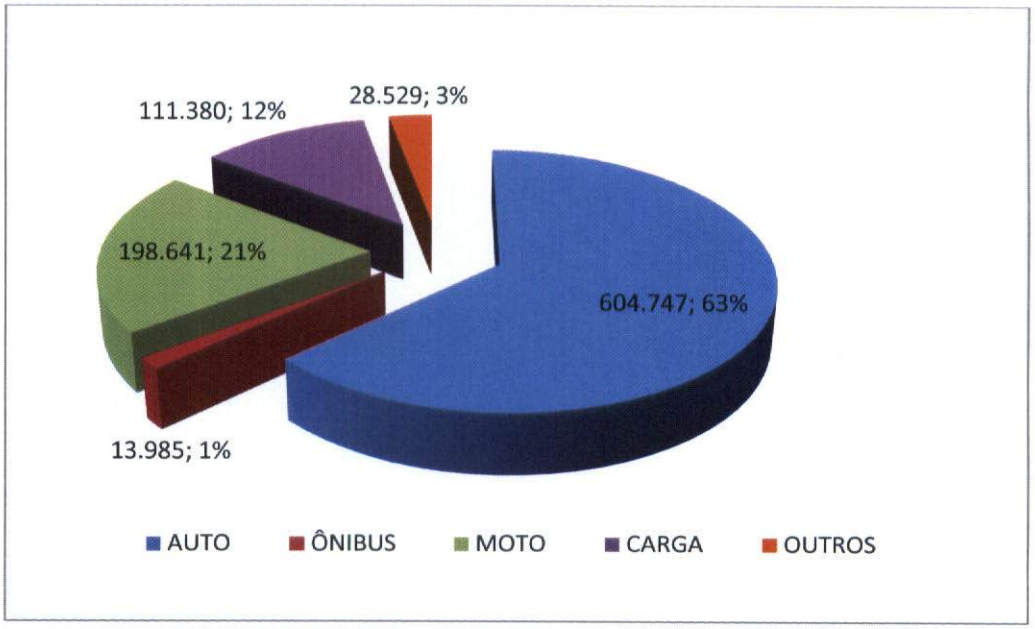

Pelos resultados apresentados na última Pesquisa Domiciliar observa-se que os modos coletivos participam com 45,93 % dos deslocamentos, muito embora seja muito significativo o peso do transporte motorizado, correspondendo a 30,33% e dentro dele crescendo fortemente o automóvel que, já com 27,32%, se aproxima do deslocamento por ônibus. Apesar de não ter sido identificado um percentual significativo na época da realização da última Pesquisa Domiciliar verifica-se também na RMR um crescimento acelerado de deslocamentos por bicicletas e motos.

É marcante o peso da marcha a pé, 23,74%, representando um dos principais indicadores da situação econômica da RMR. Quanto aos motivos das viagens, pode-se afirmar que a RMR não foge a regra de áreas do seu porte, as demandas pendulares casa-trabalho-casa e casa-estudo-casa perfazem aproximadamente 74%.

1.5 - Frota de veículos

Existe na RMR uma frota de 957.282 veículos distribuídos conforme figura a seguir. Apesar do número de automóveis ser bastante expressivo, concentra-se na moto a maior preocupação, tendo em vista a sua taxa de crescimento. Na tabela a seguir enquanto os automóveis cresceram 73% entre 1996 e 2011, as motos cresceram 652%. Este resultado é preocupante devido à falta de infraestrutura para este modo de transporte.

FIGURA 1 - FROTA SEGUNDO TIPO DE VEÍCULO NA RMR

Fonte: DETRAN/PE- março 2011

QUADRO 3 - FROTA SEGUNDO TIPO NA RMR

ANO	AUTO	ÔNIBUS	MOTO
1996	349.316	7.761	26.422
2001	411.846	9.724	58.721
2006	474.935	10.554	97.098
2011	604.747	13.985	198.641
% Crescimento 1996/2010	73	80	652

Fonte: DETRAN/PE - Março 2011

A distribuição da frota na RMR concentra-se basicamente em Recife, Olinda e Jaboatão dos Guararapes, representando 80% da mesma.

QUADRO 4 – DISTRIBUIÇÃO DA FROTA POR MUNICÍPIO DA RMR

Total RMR	957.282	100%
Abreu e Lima	16.413	1,71%
Araçoiaba	1.503	0,16%
Cabo de Santo Agostinho	28.137	2,94%
Camaragibe	25.045	2,62%
Igarassu	15.677	1,64%
Ipojuca	11.429	1,19%
Itamaracá	2.410	0,25%
Itapissuma	1.943	0,20%
Jaboatão dos Guararapes	126.182	13,18%
Moreno	10.995	1,15%
Olinda	106.057	11,08%
Paulista	59.944	6,26%
Recife	538.588	56,26%
São Lourenço da Mata	12.959	1,35%

Frota registrada, por município, RMR
Fonte: DETRAN/PE – Março 2011

2.0 - Características do STPP/RMR

2.1 - Aspectos Institucionais

O Sistema de Transporte Público Coletivo de Passageiros da Região Metropolitana do Recife – STPP/RMR é gerenciado de forma associada pelo Estado, pela Prefeitura da Cidade do Recife e pela Prefeitura de Olinda, através do Consórcio de Transportes da Região Metropolitana do Recife - CTM, sendo responsável pela gestão das linhas intermunicipais da RMR e municipais do Recife e Olinda. Os demais municípios da RMR gerenciam suas linhas

Ivana
Maria Ivana Vanderlei
Mat. 275

locais, embora alguns deles possuam convênios com o CTM, delegando parte da gestão de suas linhas para o Consórcio.

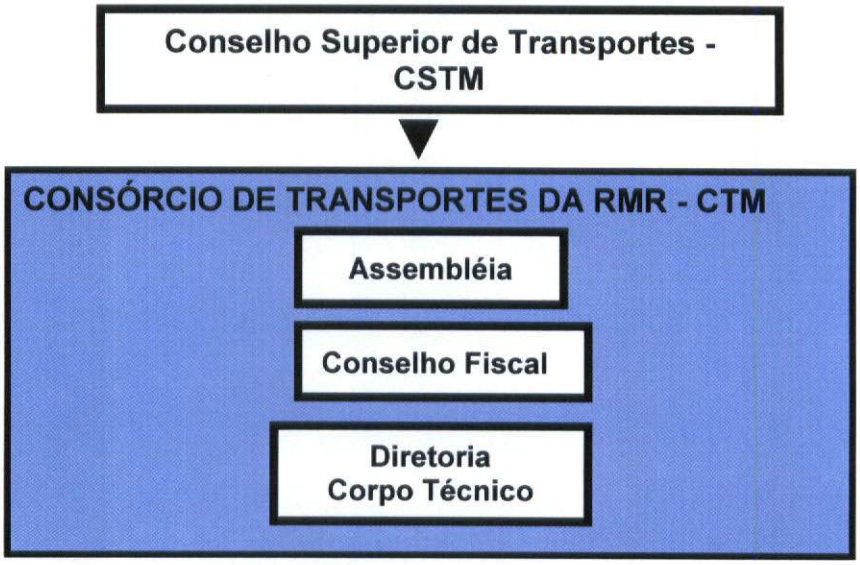

Espera-se que os demais municípios da RMR também participem do Consórcio, passando todo o sistema de transporte municipal a ser gerenciado em conjunto com o sistema metropolitano. Dessa forma, o Governo do Estado de Pernambuco e os municípios da Região Metropolitana do Recife – RMR passarão a gerenciar juntos o STPP/RMR.

Para o exercício das atribuições inerentes aos poderes concedentes, além do Consórcio, foi criado o Conselho Superior de Transportes Metropolitano – CSTM, no âmbito da Agência de Regulação dos Serviços Públicos Delegados do Estado de Pernambuco – ARPE.

A operação dos serviços de transportes do STPP/RMR é realizada, atualmente, por empresas privadas individuais e a única empresa operadora pública existente é a Companhia Brasileira de Trens Urbanos – CBTU, órgão federal ligado ao Ministério das Cidades que opera o Metrô e o Trem de Subúrbio e estão ligados ao CTM através de Convênio de Cooperação Técnica e Financeira para Operacionalização do STPP/RMR.

A estrutura do modelo de gestão do STPP/RMR e as principais características do Conselho Superior de Transportes e do Consórcio são apresentadas a seguir.

FIGURA 3: ESTRUTURA DE GESTÃO

Maria Ivana Vanderlei
Mat. 275

2.1.1 - Conselho Superior de Transportes Metropolitano – CSTM

O CSTM como entidade reguladora do STPP/RMR é responsável pelas seguintes funções:

- Fixar, a partir das propostas encaminhadas pelo CTM, as tarifas a serem cobradas dos usuários do Sistema e demais aspectos da política tarifária, que exorbitem as atribuições legais próprias do CTM no controle dos contratos de concessão com as empresas operadoras, inclusive reapreciando os valores tarifários por ocasião dos reajustes e das eventuais revisões contratuais, garantindo o equilíbrio financeiro do STPP/RMR;
- Mediar solução de conflitos entre as empresas operadoras e o CTM;
- Exercer regulação normativa relativa ao STPP/RMR estabelecendo, mediante normas gerais, diretrizes e padrões do serviço a serem observados pelas empresas operadoras;
- Editar normas gerais relativas à arrecadação e utilização das receitas complementares e acessórias, relacionadas com a prestação do serviço de transporte pelas empresas operadoras, visando à modicidade das tarifas e/ou a melhoria da qualidade dos serviços;
- Aprovar e propor a extinção do contrato de concessão com qualquer empresa operadora, após o processo administrativo assecuratório do contraditório e da ampla defesa, conduzido pelo CTM;
- Determinar diligências para esclarecimentos de aspectos relativos ao funcionamento do CTM;
- Fiscalizar a aplicabilidade dos reajustes deferidos pelo CTM e aprovar as revisões contratuais;
- Julgar os recursos interpostos pelas empresas operadoras contra aplicação da penalidade de suspensão de execução do serviço, aplicada pelo CTM; e
- Firmar contrato de gestão com o CTM ou convênios com outros municípios que se utilizem dos serviços do CTM, quando necessário.

2.1.2 - Consórcio de Transportes da Região Metropolitana do Recife - CTM

O CTM também denominado Grande Recife – Consórcio de Transporte permite um trabalho coordenado e permanente de planejamento estratégico e de gestão eficiente do transporte público entre o Estado e os municípios da RMR obedecendo as seguintes diretrizes:

- Viabilizar soluções sistêmicas para os problemas do STPP/RMR, preservando a governabilidade da gestão municipal e garantindo aos usuários as conquistas do transporte metropolitano;

Maria Ivana Vanderlei
Mat. 275

- Estabelecer uma co-responsabilidade do Estado e municípios na gestão operacional e financeira do sistema, harmonizando suas decisões políticas e técnicas e juntando-se esforços para a implantação de melhorias no sistema para os usuários;
- Propiciar maior articulação para captação de recursos financeiros a serem alocados em obras físicas para o crescimento e a sustentabilidade das cidades, principalmente para construções e ampliações de terminais integrados, ações de priorização do transporte público e a construção ou recuperação de vias por onde circulam os coletivos;
- Compatibilizar as ações do Estado e dos municípios para otimizar os recursos disponíveis, incluindo os técnicos e os financeiros, aumentando o porte das intervenções e propiciando economia de escala para o poder público;
- Aperfeiçoar o instrumento de contratação dos serviços de transporte, através de licitações públicas;
- Propiciar harmonia e integração entre a rede de linhas metropolitanas e as municipais, através de uma gestão coordenada de todos os atores;
- Obter um Sistema financeiramente equilibrado;
- Modernizar tecnologicamente o Sistema incluindo a bilhetagem eletrônica e outros instrumentos de controle operacional que poderão ser utilizados por todos os consorciados; e
- Construir uma relação formal com o metrô, considerando-o como empresa operadora do STPP/RMR, respeitando suas especificidades.

Compete ao CTM organizar, dirigir, coordenar, executar e controlar a prestação de serviços públicos relativos ao transporte público coletivo de passageiros da RMR, além das funções pertinentes ao gerenciamento, exploração e delegação dos serviços de transportes públicos de passageiros na RMR, sempre em conformidade com as normas gerais emitidas pelo Conselho Superior de Transportes Metropolitano - CSTM.

São finalidades do CTM, como entidade gestora do STPP/RMR:

- Promover a qualidade dos serviços, a eficiência e o equilíbrio econômico-financeiro do STPP/RMR;
- Assegurar que os serviços de transporte público coletivo de passageiros na Região Metropolitana do Recife - RMR sejam prestados de acordo com parâmetros adequados de regularidade, continuidade, eficiência, segurança, atualidade, generalidade, cortesia e modicidade das tarifas;
- Estimular a integração do STPP/RMR e a expansão da cobertura dos serviços de transporte público coletivo de passageiros na RMR;

Maria Ivana Vanderlei
Mat. 275

- Estimular o desenvolvimento do STTP/RMR através da promoção de investimentos necessários e do avanço tecnológico do setor;
- Induzir o aumento de produtividade e a melhoria de desempenho das empresas operadoras para atuar na busca permanente de redução de custos operacionais;
- Prover condições adequadas de transporte público à população, tanto em termos qualitativos como quantitativos, compatíveis com a capacidade de pagamento dos usuários; e
- Estabelecer, fiscalizar, avaliar e controlar os parâmetros do serviço prestado pelas empresas operadoras, dentro das especificações estipuladas nos contratos, no Regulamento do STPP - RTPP/RMR, no Manual de Operações e nas demais normas.

Para que seja possível o CTM exercer suas atribuições ele poderá:

- Celebrar contratos, inclusive parcerias público-privadas – PPP, cumpridas as exigências previstas no Contrato Social, convênios ou quaisquer outros instrumentos pertinentes;
- Contrair empréstimos ou financiamentos, atendidos os requisitos previstos no Contrato Social;
- Promover desapropriações e instituir servidões consoante declaração de utilidade, necessidade pública ou interesse social, realizada pelo Poder Público;
- Atuar como contratada por entidades políticas ou administrativas da Federação, destinando as receitas advindas dos contratos à melhoria do STPP/RMR;
- Receber auxílios ou subvenções sociais ou econômicas de outras entidades ou órgãos do Poder Público;
- Entrar e permanecer a qualquer hora do funcionamento e pelo tempo necessário nas dependências ou bens vinculados ao serviço, por meio de seus servidores ou subcontratados credenciados e devidamente identificados, visando à consecução dos objetivos previstos no Contrato Social, mediante prévia notificação, a ser enviada com antecedência mínima de 48 (quarenta e oito) horas e devidamente justificada;
- Examinar toda e qualquer documentação e ter acesso aos dados relativos à administração, contabilidade, recursos operacionais, técnicos, econômicos e financeiros das empresas operadoras do STPP/RMR, mediante solicitação por escrito a ser encaminhada pela Sociedade a tais operadoras, devidamente motivadas;
- Administrar recursos materiais, humanos, orçamentários e financeiros que lhe forem necessários para seu funcionamento;
- Celebrar contratos ou outro instrumento jurídico com quaisquer órgãos responsáveis pela gestão e operação do sistema metro-ferroviário de passageiros na RMR; e
- Estabelecer convênios, contratos e acordos, bem como articular-se com outros órgãos, conselhos e/ou entidades sobre matérias de interesse comum.

Maria Ivana Vanderlei
Mat. 275

2.2 - Concepção do STPP/RMR

O STPP/RMR, gerenciado pelo CTM, é constituído por dois sistemas: o **Sistema Estrutural Integrado - SEI** e o **Sistema Complementar.**

O Sistema Estrutural Integrado caracteriza-se por ser um sistema tronco-alimentador, constituindo uma malha estrutural com condições físicas, operacionais e tarifárias específicas. A partir de suas linhas troncais (radiais, perimetrais e interterminais), alimentadoras e circulares permite que os usuários disponham de várias alternativas de deslocamento por meio de integrações em terminais e estações fechados e com o pagamento de uma única passagem, por sentido de deslocamento.

O Sistema Complementar é constituído por linhas convencionais, operadas por ônibus e veículos de pequeno porte (VPP) que complementam o SEI. A maioria das linhas converge para o Centro do Recife, apresentando-se como uma rede de linhas rádio-concêntrica. Entretanto, propõe-se que haja uma migração progressiva dessas linhas para o SEI, com a implantação dos terminais integrados e corredores priorizados para o transporte coletivo, pertencentes ao SEI.

O Sistema Estrutural Integrado é racional e permite uma maior integração metropolitana. Ele funciona como um importante instrumento de inclusão social, pois seus usuários podem se deslocar a baixo custo para os locais onde existem polos geradores/atratores de demanda, tais como escolas, hospitais, negócios, áreas de lazer ou outros serviços importantes. O SEI possibilita que empresas e indústrias existentes na RMR possam selecionar sua mão-de-obra em toda região e não somente na área de entorno da sua localização.

2.2.1 - Sistema Estrutural Integrado- SEI

O SEI foi concebido em 1985 e reformulado em 1992, 2005 e 2010, como proposta de racionalização dos transportes urbanos na Região Metropolitana do Recife – RMR.

A estrutura existente, antes do SEI ser concebido, convergia para uma iminente saturação face à defasagem estrutural dos sistemas viário e de circulação, em relação à rede operacional uma gradativa despolarização das linhas de desejo das demandas do transporte coletivo e à necessidade de atendê-las.

A estrutura viária de corredores radiais e perimetrais da RMR favoreceu a concepção de uma rede de transporte urbano integrada de forma operacional e tarifária, que garante aos usuários o acesso a diversas localidades da RMR com o pagamento de uma única tarifa por sentido.

Ivana
Maria Ivana Vanderlei
Mat. 275

O modelo concebido é tronco-alimentador formado por uma malha composta por sete corredores radiais, sendo dois ferroviários, convergentes ao Centro do Recife, oriundos da periferia da região e quatro corredores perimetrais, que ligam a RMR de norte a sul, sem passar pelo centro. Circulam por esta malha linhas troncais operadas por ônibus e metrô, alimentados por linhas que captam a demanda e as levam para os Terminais de Integração. Este Sistema permite o livre percurso dos passageiros pela Rede, após seu ingresso, através da integração em seus terminais ou estações fechados.

Uma das características do SEI é a sua possibilidade de implantação de forma gradual e progressiva, sem exigir grandes investimentos em curtos períodos de tempo. Dessa forma, os corredores estruturais radiais e perimetrais podem iniciar sua operação com equipamentos sobre pneus, evoluindo com o tempo tanto na infraestrutura (faixas exclusivas, canaletas etc.) como na operação (veículos articulados, operação em comboios etc.), podendo, alguns deles, chegar a longo prazo a operar com equipamento em via fixa ou utilizar novas tecnologias de transporte de massa que venham a ser desenvolvidas e adequadas ao nosso contexto.

2.2.2 - Sistema Complementar

O Sistema Complementar é constituído por linhas convencionais radiais, transversais, diametrais e circulares, operadas por ônibus leve, médio, pesado, extrapesado e de pequeno porte (VPP). Apesar de representar atualmente a maioria das viagens realizadas no STPP/RMR, propõe-se que haja uma migração progressiva dessas linhas para o SEI reduzindo sua participação a 30%. Entretanto, a priorização do transporte coletivo nos seus corredores é tão importante quanto aos do SEI.

Como a maioria das linhas do Sistema de Transportes da RMR ainda converge para o Centro do Recife, o STPP/RMR apresenta-se com uma rede de linhas rádio-concêntrica. Com a implantação do SEI, esta característica está sendo modificada, passando a rede de linhas a apresentar uma configuração mais adaptada ao desenvolvimento e as tendências da ocupação urbana da RMR.

2.3 - Infraestrutura do STPP/RMR

Para a operação do STPP/RMR os veículos utilizam o sistema viário da RMR, principalmente os principais corredores que permitem ligações de bairros e municípios diversos com o Centro do Recife.

Além do sistema viário, os terminais, miniterminais, pontos de paradas e abrigos também desempenham um importante papel no STPP/RMR e são considerados como parte da infraestrutura necessária para proporcionar aos usuários uma rede de transporte de qualidade.

Para fins de planejamento e priorização do transporte coletivo esses corredores foram distribuídos entre o SEI e o Sistema Complementar, bem como os principais equipamentos que compõem sua infraestrutura.

2.3.1 - Sistema Viário e Terminais do SEI

Como forma de garantir acessibilidade aos diversos componentes de sua estrutura urbana e mobilidade à população da RMR, na época de sua concepção foram selecionados 10 (dez) corredores estruturais do SEI, dos quais seis radiais e quatro perimetrais. Em 2005, foi incluído como corredor radial do SEI o conjunto de vias constituído pela Av. Abdias de Carvalho e BR-232.

Apesar de ter havido uma grande racionalização das linhas do STPP/RMR e um aumento da mobilidade da população usuária do transporte público a partir da construção dos Terminais do SEI, muito pouco foi feito em matéria de priorizar o transporte público, acarretando uma redução gradativa da velocidade nos corredores a medida do crescimento da frota. Em resumo, todo ganho advindo dos benefícios proporcionados pelos terminais do SEI não são percebidos devido ao aumento do tempo de viagem e a falta de regularidade das linhas diante dos problemas no trânsito.

Para combater este impasse o governo está construindo dois corredores nos moldes do BRT existentes em Curitiba e Bogotá, denominados Leste/Oeste e Norte/Sul. Trata-se de sistemas denominados Transporte Rápido por Ônibus - TRO, que estão sendo implantados nos corredores estruturais do SEI e deverão operar com eficácia máxima. O TRO, a ser implantado no STPP/RMR, que deverá apresentar as seguintes características:

a) Sistema Viário: Vias priorizadas para o transporte público de passageiros em relação ao individual, através de corredores de ônibus que operem em faixas exclusivas ou segregadas do restante do tráfego, com ultrapassagem e prioridade em cruzamentos;

b) Estações, Paradas, Terminais: Estes equipamentos urbanos estão sendo construídos no mesmo nível do piso do veículo, facilitando o embarque e desembarque de passageiros. Deve contribuir, sobretudo, no acesso dos usuários com mobilidade reduzida e possuir como principal função propiciar uma maior velocidade comercial para o corredor, por reduzir o tempo de embarque, além de conforto e segurança para os usuários.

c) Veículos: São equipamentos dotados de tecnologia de última geração, dimensionados de acordo com a demanda e que possuem como principais características o conforto e a modernidade, retratada através da altura do piso, localização do motor, direção hidráulica, câmbio automático e climatização, entre outros atributos;

d) Plano de Operação e Serviços: A operação dos veículos visa oferecer aos usuários um serviço eficiente, rápido, confortável e seguro, para tanto deve ser cuidadosamente planejada. Este planejamento pode conter esquemas operacionais, tais como: serviço expresso, parador ou reforço de frota em trechos de linhas onde a demanda dos usuários exija, dentre outros.

e) Arrecadação: O processo de pagamento das tarifas é realizado através de sistema de bilhetagem eletrônica, interna às estações e fora do veículo, obtendo-se uma redução no tempo de viagem, semelhantemente ao que ocorre no sistema metroviário;

f) Sistemas de Transporte Inteligentes - ITS: O TRO deve dispor de um Sistema de Gestão Inteligente, compreendendo o Sistema de Informações e o CMO, responsáveis pela monitoração em tempo real do corredor, propiciando regulação e manutenção da normalidade do sistema;

g) Sistema de Sinalização responsável pela prioridade para os ônibus na circulação das vias; e

h) Comunicação de fácil acesso e utilizando tecnologia avançada que indique o programa horário da linha ou o horário da próxima viagem, entre outras informações.

2.3.2 - Corredores

2.3.2.1 - Corredores Estruturais Radiais

Os corredores estruturais radiais do SEI permitem as ligações entre os municípios da RMR em direção ao Centro do Recife. São eles:

a. Corredor Metroviário Sul e Sua Extensão até o Cabo

Este corredor liga a área sul, Município do Cabo Santo Agostinho ao Centro do Recife, passando pelo Município de Jaboatão dos Guararapes.

Maria Ivana Vanderlei
Mat. 275

b. Corredor Metroviário Centro e seu Ramal Coqueiral/Rodoviária/ Camaragibe

Este corredor liga os municípios de Camaragibe e Jaboatão dos Guararapes, localizados na área oeste da RMR, ao Centro do Recife.

c. Corredor da Av. Caxangá

Este corredor permite a ligação rodoviária dos municípios de São Lourenço da Mata e Camaragibe, através das seguintes vias: Av. Belmino Correia (PE-05), Av. Caxangá, Rua Benfica, Praça do Derby e demais vias do Centro Expandido. O corredor possui tratamento prioritário para transporte coletivo em quase toda extensão. O Município de Camaragibe é interligado com o corredor Metroviário Centro, através do terminal Integrado de Camaragibe. Está sendo implantado neste corredor o Transporte Rápido por Ônibus - TRO.

d. Corredor da Av. Norte

Liga o Terminal de Integração da Macaxeira, situado na interseção da Av. Norte com a BR-101, ao Centro do Recife através da Av. Norte e da Av. Cruz Cabugá ao Bairro do Recife, centro antigo do município. De todos os corredores radiais estruturais é o que apresenta perspectiva mais modesta de evolução, uma vez que o mesmo termina na BR-101 (Macaxeira), sem possibilidades de prolongamentos.

e. Corredor Presidente Kennedy / Anel Norte

Esta via interliga Recife à Olinda, partindo da Av. Cruz Cabugá, Complexo Salgadinho e Av. Presidente Kennedy até a BR-101 Norte, ligando-se ao Terminal Integrado de Camaragibe, através de um anel viário proposto. Este corredor receberá tratamento prioritário para o transporte público após a implantação de faixa exclusiva para ônibus, já em fase de conclusão.

f. Corredor da PE-15

Este corredor interliga Recife a área norte da RMR, através dos municípios de Olinda, Paulista, Abreu e Lima, Igarassu, Araçoiaba, Itapissuma e Itamaracá. Tem como ponto de partida o Terminal Integrado de Igarassu, incorporando parte da BR-101 (Norte), a PE-15 e o Complexo de Salgadinho, atingindo o Centro do Recife, através da Av. Cruz Cabugá. Possui em quase toda sua extensão pista central exclusiva para ônibus, faltando apenas à priorização para o STPP/RMR no trecho da Av. Cruz Cabugá até o Centro do Recife. Está sendo implantado neste corredor o Transporte Rápido por Ônibus - TRO.

Maria Ivana Vanderlei
Mat. 275

g. Corredor Av. Abdias de Carvalho

Este corredor interliga os municípios de Recife e Jaboatão dos Guararapes onde está situado o Distrito Industrial do Curado. Tem como ponto de partida o Terminal situado no Terminal Rodoviário de Passageiros, atingindo o Centro do Recife através da BR-232 e Av. Abdias de Carvalho.

2.3.2.2 - Corredores Estruturais Perimetrais

Os corredores estruturais perimetrais do SEI permitem ligações transversais entre os municípios da RMR, não sendo direcionados para o Centro do Recife. Eles interligam os corredores estruturais radiais, constituindo uma malha viária que proporciona diversas opções de origens e destinos, através de pontos de troca. São eles:

a) I Perimetral (Av. Agamenon Magalhães)

É constituído pela Av. Agamenon Magalhães, limite do Centro Expandido do Recife, podendo ser considerado como iniciando na Av. Antônio de Góis / Herculano Bandeira, no bairro do Pina, prolongando-se até o Complexo Salgadinho / Girador da Av. Presidente Kennedy. Permite a ligação do Terminal Integrado de Joana Bezerra ao Terminal Integrado da PE-15, passando pelo Derby, importante ponto de transbordo dos usuários do transporte coletivo. Está previsto para este corredor a implementação do Transporte Rápido por Ônibus – TRO.

b) II Perimetral (Estrada Remédios/Real da Torre)

Esse corredor é formado por uma sequência de vias do Município do Recife até o Município de Olinda. Inicia-se na Estrada dos Remédios/ Real da Torre, Estrada Velha de Água Fria seguindo pela II Perimetral até a PE-15 em Olinda. Ele permite a ligação entre o Terminal de Afogados e o Terminal Integrado da PE-15.

c) III Perimetral (Av. Recife / San Martin)

Interliga a Av. Recife, a partir do Terminal de Integração de Tancredo Neves, no bairro da Imbiribeira, a Av. San Martin, cruzando a Av. Caxangá. O traçado previsto deste corredor, a partir do cruzamento com a Av. Caxangá, cortará o Bairro de Casa Forte e os morros de Casa Amarela, seguindo a diretriz da Estrada do Caenga e da Estrada da Mirueira até seu encontro com o Terminal de Integração Pelópidas Silveira na PE-22.

Ivana
Maria Ivana Vanderlei
Mat. 275

d) IV Perimetral (Contorno do Recife)

Corresponde ao trecho central da BR-101/ Contorno do Recife que fica localizada na área urbana da RMR. Interliga o Terminal Integrado de Cajueiro Seco, passando pelo Terminal Integrado do Barro, pelo Terminal da Macaxeira, pela interseção da PE-15 com a BR-101 no Terminal Integrado de Abreu e Lima.

2.3.3 - Terminais, Miniterminais, Abrigos e Paradas

Os terminais das linhas são locais previamente determinados pelo CTM. Neles são instaladas infraestruturas mínimas que proporcionam conforto e segurança aos usuários e facilitam o controle e o acompanhamento da operação pelo pessoal de operação e a fiscalização do CTM. Estes terminais deverão possuir comunicação visual e infraestrutura compatíveis com o número de linhas e quantidade de usuários que deles se utilizam.

As estruturas físicas construídas nos locais dos terminais das linhas são denominadas:

2.3.3.1 - Terminais e Miniterminais

a - Terminal de subúrbio ou miniterminal: quando utilizado por uma linha específica ou um pequeno grupo de linhas, exclusivamente para facilitar o controle da operação e disponibilizar local adequado de trabalho para o pessoal de operação;

b - Terminal de Integração: quando convergem muitas linhas e usuários, permitindo condições adequadas de transbordo. Os terminais de integração são construídos e mantidos diretamente pelo CTM ou através da terceirização, enquanto que os miniterminais deverão ser mantidos, após licitação, pelas empresas operadoras, através do Contrato de Concessão de Direito Real de Uso.

No STPP/RMR existem dois tipos de terminais:

a) **Terminais Fechados** (confinados): onde o acesso dos usuários é feito através das linhas de ônibus que operam no Terminal ou pelo pagamento da tarifa nas bilheterias do terminal e uma vez dentro dele, o acesso às diferentes linhas ou modais, ou transferências entre eles, é livre, desta forma são consideradas áreas pagas; e

b) **Terminais Abertos**: onde a tarifa é cobrada dentro dos veículos e a integração tarifária só é possível através de bilhetes ou da bilhetagem eletrônica.

Toda e qualquer atividade comercial desenvolvida na área do terminal ficará subordinada as determinações e critérios definidos pelo CTM.

Ivana
Maria Ivana Vanderlei
Mat. 275

2.3.3.2 - Abrigos e Paradas

Os pontos de paradas são distanciados de acordo com a densidade populacional das áreas adjacentes e obedecem às restrições de circulação nas vias, devendo estar sinalizados com placa indicativa e/ou abrigo, implantadas pelo CTM.

As distâncias entre os pontos de parada normalmente variam de 250 a 350 metros no Centro Expandido do Recife e de 350 a 500 metros para as demais áreas.

A maioria das linhas do STPP/RMR não possui terminal no Centro do Recife, entretanto possuem uma parada especial denominada ponto de retorno, onde normalmente existem abrigos e comunicação visual informando que linhas ali param.

No STPP/RMR existe também o ponto de parada seletiva para embarque e desembarque de passageiros de linhas específicas, no qual são colocadas placas de sinalização contendo, no mínimo, o nome e o código das linhas que ali param.

2.3.4 - Terminais e Pontos de Integração do SEI

Os terminais de integração do SEI operam segundo o conceito de terminais fechados e estão localizados em pontos de convergência de um número expressivo de linhas troncais e/ou alimentadoras. Normalmente localizam-se próximos aos corredores troncais ou nas interseções de corredores troncais radiais com perimetrais.

Os pontos de integração ficam situados nas interseções acima referidas e neles ocorre uma quantidade significativa de transbordos. Eles deverão receber atenções especiais, procurando-se dar aos locais infraestruturas (estações, abrigos, sinalização, iluminação, entre outros) e comunicação visual e informação adequadas para facilitar as transferências dos usuários de uma linha para outra. Para viabilizar a operação nos pontos de integração torna-se necessário a utilização do Sistema de Controle da Bilhetagem Eletrônica - SCBE

A seguir estão relacionados por corredor os terminais integrados planejados para o SEI. Os Terminais do SEI que permitam integrações com o metrô são construídos contíguos às estações de mesmo nome.

a) Corredor Metroviário Sul: Terminal Integrado José Faustino dos Santos (Cabo de Santo Agostinho), Cajueiro Seco, Aeroporto, Tancredo Neves e Recife, em operação. E o Terminal Integrado de Joana Bezerra a ser ampliado até o primeiro semestre de 2014 e os Terminais Integrados de Largo da Paz e Prazeres operacionalizado até o primeiro semestre de 2014.

Joana
Maria Ivana Vanderlei
Mat. 275

b) Corredor Metroviário Centro (Camaragibe/Recife/Jaboatão): Terminais Integrados de Jaboatão, Cavaleiro, TIP, Afogados, e Recife já em operação. Terminais Integrados do Barro e Joana Bezerra estão sendo ampliados e Santa Luzia em construção, com início de operação previsto para primeiro semestre de 2014 e Camaragibe com adaptação para o sistema BRT e Cidade da Copa para 2014.

FIGURA 15: TI AEROPORTO

c) Corredor Presidente Kennedy/Anel Norte: Terminal Integrado Xambá já em operação no segundo semestre de 2013.

Maria Ivana Vanderlei
Mat. 275

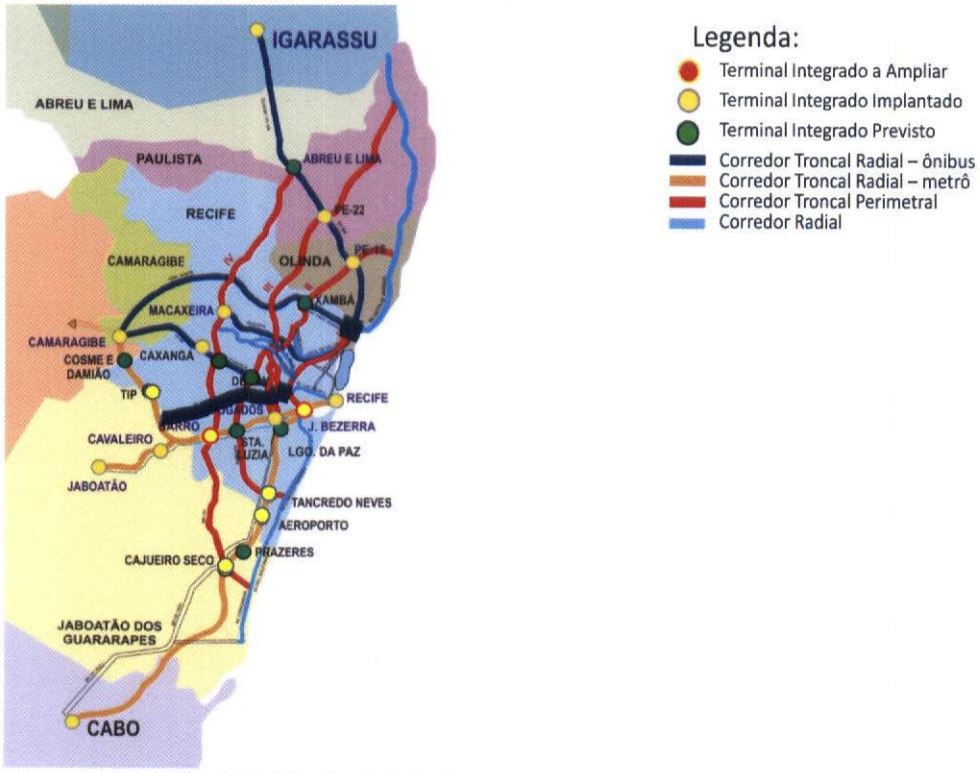

d) Corredor da PE-15/BR-101 Norte: Terminais Integrados Igarassu, Pelópidas Silveira e Milton de Oliveira Santos (PE-15), já em operação, com adaptação para o sistema TRO com previsão para 2014 e o Terminal Integrado de Abreu e Lima sendo concluído até 2014.

e) Corredor da Av. Caxangá: Terminais Integrados Caxangá, e Camaragibe já em operação, porém Camaragibe com adaptação para o Sistema TRO previsto para 2014 e Terminais Integrados da IV Perimetral e III Perimetral entrarão em operação juntamente com a implantação do TRO, prevista para 2014.

f) Corredor da Av. Norte:

Em alguns dos pontos de integração estratégicos para o SEI não é possível construir terminais, inclusive alguns se localizam em binários, de forma que o ponto de transbordo num sentido é uma via e no sentido contrário, em outra. Entretanto, nos pontos localizados no Complexo de Salgadinho, interseção da Av. Agamenon Magalhães com a Av. Presidente Kennedy e no Derby, próximo ao Centro do Recife, a quantidade de transbordo e troca entre linhas é muito grande, sendo, portanto previsto a construção de estações do TRO dotadas de uma infraestrutura adequada, com plataformas cobertas e boas condições de acessibilidade para os usuários.

FIGURA 16 - MAPA ESQUEMÁTICO DO STPP/RMR

Fonte: Grande Recife - Consórcio de Transporte

Maria Ivana Vanderlei
Mat. 275

2.3.5 - Sistema Viário e Terminais do Sistema Complementar

Além de utilizar as vias locais e secundárias dos municípios que constituem a RMR as linhas do Sistema Complementar utilizam importantes corredores de tráfego. São considerados corredores principais do Sistema Complementar:

2.3.5.1 - Corredores Principais do Sistema Complementar

a) Av. Domingos Ferreira/Av. Boa Viagem/Av. Bernardo Vieira de Melo;
b) Av. Rui Barbosa/ Av. Rosa e Silva
c) Estrada de Belém
d) Av. Beberibe; e
e) Av. Getúlio Vargas/Av. José Augusto Moreira/Av. Carlos de Lima Cavalcanti

Dos corredores acima listados o da Av. Domingos Ferreira /Av. Conselheiro Aguiar/ Av. Boa Viagem/ Av. Bernardo Vieira de Melo possui um fluxo de veículos e passageiros transportados que justifica, atualmente, a implantação de um tratamento preferencial para o transporte público coletivo. Este tratamento só poderá ser realizado quando do término da Via Mangue, pois se espera que ela desvie boa parte do tráfego de carro passeio que utiliza a Av. Domingos Ferreira, ficando uma faixa da via liberada para implantação do corredor.

Da mesma forma, que nos corredores do SEI, Este corredor está previsto para ser do SEI, nesse Sistema devem ser construídos Terminais com estrutura adequada e segura, que facilite o transbordo e troca de linhas pelos usuários. Devem ser construídos sempre que constatada a necessidade de racionalização do passando a ser um corredor do Sistema Estrutural Integrado - SEI

2.3.5.2 - Sistema Viário do Centro do Recife

Os corredores radiais do SEI e do Sistema Complementar convergem para várias avenidas e ruas que compõem a área central do Recife, contando em alguns trechos com vias exclusivas para o transporte coletivo. Esta área por ser cortada por rios possui limitações físicas, como o número elevado de pontes, reduzindo a velocidade de circulação, hoje abaixo de 15 km/h.

2.4 - Instalações e Equipamentos do STPP/RMR

Entre os equipamentos utilizados para a prestação dos serviços de transporte no STPP/RMR destacam-se a frota e os equipamentos de controle e de segurança, estabelecidos

Ivana
Maria Ivana Vanderlei
Mat. 275

de acordo com os Contratos de Concessões, Regulamento, Manual de Operação e normas e instruções complementares pertinentes.

2.4.1 - Frota

A frota em operação das Concessionárias e Permissionárias deve possuir idade média de 3,5 (três vírgula cinco) anos, vida útil por veículos de 07 (sete) anos, para veículo leve, médio e pesado e de 8 (oito) anos de idade média e 10 (dez) anos de vida útil para Padron e extrapesado (articulado e biarticulado).

Os veículos que circulam no STPP/RMR têm características técnicas, comunicação visual e equipamentos definidos pelo CTM, além de possuírem laudo de vistoria de gases poluentes, de ruídos e de segurança veicular emitidos por entidade técnica especializada. Possuem também seguro contra riscos e responsabilidade civil.

Entre outras especificações, os veículos de cada concessionária devem obedecer as disposições da Norma da ABNT NBR 15570:2009 e aos seguintes requisitos:

I. ter tipo, características e idade conforme especificado no Contrato de Concessão, Regulamento, no Manual de Operação, Caracterização do Lote e Ordem de Serviço da Operação - OSO;
II. possuir equipamentos e sistemas eletrônicos necessários ao pleno funcionamento do sistema de coleta de dados do CTM, conforme especificações contida no Manual de Operação;
III. possuir sistema de monitoramento de localização dos ônibus em condições de ser conectado ao Sistema Inteligente de Monitoramento da Operação – Simop do CTM;
IV. utilizar bancos estofados;
V. ter painel traseiro liso que possibilite a fixação de adesivos;
VI. ter sistema de climatização (nas linhas troncais do SEI);
VII. ter câmbio automático ou automatizado, na renovação da frota;
VIII. ter, no mínimo, pneus radiais na dianteira;
IX. apresentar comunicação visual de acordo com a estabelecida pelo CTM;
X. estar assegurado contra riscos de responsabilidade civil, com cobertura para passageiros e terceiros;
XI. não possuir débitos de IPVA, de seguro obrigatório e taxas de trânsito;
XII. possuir sistema de comunicação do veículo com o passageiro e com o Controle Operacional do CTM; e
XIII. ter no mínimo 03 (três) portas, sendo a do meio dotada de Plataforma Elevatória Veicular para embarque e desembarque de pessoa com deficiência ou mobilidade reduzida em cadeira de rodas, com exceção dos veículos de pequeno porte, que deverá utilizar a porta dianteira para esse fim.

Maria Ivana Vanderlei
Mat. 275

A frota do STPP/RMR está classificada de acordo com o Manual de Operação em leve, média, pesada, Padron e extrapesado dependendo da distância entre eixos, potência do motor, peso e torque. Os veículos Padron e extrapesado possuem características diferenciadas de capacidade e conforto e são utilizados principalmente em linhas troncais de grande demanda.

Dentre as características de conforto estão bancos estofados, piso em lâmina de fórmica, janela com abertura na parte inferior e ar-condicionado nas linhas troncais do SEI.

As características mínimas dos veículos a serem colocados em operação por linha obedecem aos determinados pelo CTM sendo compatíveis com a demanda e tipo do serviço especificado para as linhas e definido através das seguintes nomenclaturas:

- Extrapesado 2 (BRT 2) - Veículo tipo ônibus, de característica urbana, com chassi composto por dois ou três módulos unidos por articulação, munido de ar condicionado em todos os módulos, piso na altura da plataforma das estações de embarque e desembarque de passageiros, além de outros itens especiais de conforto, portas de embarque e desembarque de passageiros dos dois lados e capacidade mínima de oferta para 100 (cem) lugares;
- Leve - Veículo tipo ônibus de característica urbana e capacidade mínima e máxima de oferta entre 30 (trinta) e 40 (quarenta) lugares;
- Leve com AR - Veículo tipo ônibus de característica urbana, munido de ar condicionado e capacidade mínima e máxima de oferta entre 30 (trinta) e 40 (quarenta) lugares;
- Médio - Veículo tipo ônibus de característica urbana e capacidade mínima de oferta para 70 (setenta) lugares;
- Médio com AR - Veículo tipo ônibus de característica urbana, munido de ar condicionado e capacidade mínima de oferta para 70 (setenta) lugares;
- Pesado - Veículo tipo ônibus de característica urbana e capacidade mínima de oferta para 80 (oitenta) lugares;
- Pesado com AR - Veículo tipo ônibus de característica urbana, munido de ar condicionado e capacidade mínima de oferta para 80 (oitenta) lugares;
- Padron - Veículo tipo ônibus de característica urbana e capacidade mínima de oferta para 80 (oitenta) lugares, com direção hidráulica, câmbio automático e motor traseiro;
- Padron com AR - Veículo tipo ônibus de característica urbana, munido de ar condicionado e capacidade mínima de oferta para 80 (oitenta) lugares, com direção hidráulica, câmbio automático e motor traseiro, munido de ar condicionado;
- Extrapesado (Articulado) - Veículo tipo ônibus de característica urbana com chassi composto por dois módulos unidos por articulação e capacidade mínima de oferta para 100 (cem) lugares;
- Extrapesado (Articulado com AR) - Veículo tipo ônibus de característica urbana, com chassi composto por dois módulos unidos por articulação, munido de ar

Ivana
Maria Ivana Vanderlei
Mat. 275

condicionado em ambos os módulos e capacidade mínima de oferta para 100 (cem) lugares;

- Extrapesado (Bi-articulado) – Veículo tipo ônibus de característica urbana com chassi composto por três módulos unidos por articulação e capacidade mínima de oferta para 160 (cento e sessenta) lugares.
- Extrapesado (Bi-articulado com AR) – Veículo tipo ônibus de característica urbana, com chassi composto por três módulos unidos por articulação, munido de ar condicionado em todos os módulos e capacidade mínima de oferta para 160 (cento e sessenta) lugares.

Não é permitido que veículos descadastrados pelo CTM circulem com comunicação visual ou equipamentos relativos ao STPP/RMR.

Os veículos tipo BRT 2 devem seguir as características mínimas definidas na Tabela na pagina 51, no final deste Anexo.

2.4.2 - Equipamentos de Controle e Segurança

Todos os veículos possuem no seu interior catraca para a contagem dos usuários e validadores dos cartões eletrônicos do Sistema de Controle da Bilhetagem Eletrônica – SCBE, com exceção dos veículos destinados ao Sistema TRO.

Os ônibus e terminais de integração do STPP/RMR são equipados com micro-câmeras internas e externas e outros dispositivos de segurança. Para isto o CTM especifica e homologa os equipamentos a serem utilizados, estabelecendo um cronograma de implantação que deverá ser cumprido pelas empresas operadoras.

- Garagens

As empresas operadoras deverão estar com suas edificações legalizadas junto a Prefeitura e órgãos responsáveis pelo meio ambiente e devidamente cadastradas no CTM, contendo layout, elementos e informações do tipo: áreas de escritório, oficina e pátio de estacionamento, tipo de pavimento, equipamentos existentes, com todas as características de acordo com as especificações estabelecidas no Contrato de Concessões, no Regulamento do STPP/RMR, no Manual de Operação do STPP/RMR e em normas complementares. Nestes instrumentos legais também estão contidos os cuidados necessários para evitar a poluição por ruídos, gases e dejetos na rede de esgotos.

Não é permitido os veículos estacionarem do lado externo das garagens, obstruindo o sistema viário.

Ivana
Maria Ivana Vanderlei
Mat. 275

2.5 - Estrutura Operacional do STPP/RMR

A estrutura operacional do STPP/RMR acompanha sua infraestrutura com características específicas para o Sistema Estrutural Integrado e o Sistema Complementar.

2.5.1 - Características Operacionais do SEI

O Sistema Estrutural Integrado - SEI é um sistema troco-alimentador possuindo tipos de linhas com comunicação visual e formas de integração específicas.

2.5.1.1 - Tipos de Linhas

As linhas do SEI são classificadas em troncais ou alimentadoras.

As linhas troncais são operadas por equipamentos de grande e média capacidades, tais como metrô, BRT 2, extrapesados e padrons. Elas podem ser Troncais: radiais, perimetrais ou interterminais. As linhas radiais têm seus itinerários pelos corredores radiais, com destino ao Centro do Recife, as perimetrais, através dos eixos perimetrais e as interterminais que percorrem trechos dos corredores radiais e trechos das perimetrais, tendo como origem e destino terminais de integração. Essas linhas normalmente oferecem um bom serviço para a população e, na maioria delas, os intervalos de pico se situam em torno de cinco minutos.

As linhas alimentadoras são operadas por ônibus de média e pequena capacidades. Tem seus itinerários em sua maioria em vias locais, possuindo a função de transportar os usuários para os terminais de integração, onde complementam seus destinos através das linhas troncais ou de outras linhas alimentadoras. No SEI existem linhas alimentadoras especiais que recebem a denominação de circulares e distribuidoras.

2.5.1.2 - Integrações

O SEI é um sistema com integração plena: física, operacional e tarifária. Nos terminais fechados os usuários podem utilizar quaisquer das suas linhas, com os horários de chegada das alimentadoras, no sentido subúrbio/cidade e as saídas das linhas troncais compatibilizados. O SEI permite que, após efetuar o pagamento da tarifa na primeira linha, os usuários tenham livre percurso nos terminais e linhas do Sistema, através de integração em terminais fechados ou estações do SEI.

As integrações tarifárias permitem uma redução no custo de deslocamento dos usuários que necessitam utilizar duas linhas de ônibus.

2.5.1.3 - Comunicação Visual

O SEI possui uma comunicação visual própria estabelecida pelo CTM. Esta comunicação visual se utiliza das cores da bandeira de Pernambuco, que permite sua fácil identificação do Sistema pelos usuários. Todos os ônibus do SEI são pintados de acordo com a classificação da linha, quais sejam: os ônibus das linhas troncais radiais são azuis, das troncais perimetrais vermelhos, das interterminais verdes, das alimentadoras amarelas e das circulares e distribuidoras brancos.

FIGURA 14: COMUNICAÇÃO VISUAL SEI

Da mesma forma, as paradas do SEI e seus terminais também possuem uma visualização diferenciada.

2.5.2 - Características Operacionais do Sistema Complementar

O Sistema Complementar caracteriza-se por atender de forma normalmente direta, pares de origem e destino dos usuários. Neste Sistema estão incluídos os demais serviços e linhas que não são do SEI. As linhas deste Sistema são operadas por veículos de média e pequena capacidades, como ônibus leve, médio, pesado, extrapesado, ônibus especiais, micro-ônibus ou veículos de pequeno porte (VPP).

A participação deste Sistema no STPP/RMR deverá ser gradualmente reduzida e substituída pelo SEI. Entretanto algumas especificidades e características de parte do STPP/RMR farão com que ele seja mantido no STPP/RMR mesmo com a implantação total do SEI.

No Sistema Complementar estão incluídos os serviços convencionais, complementares, especiais, opcionais e locais.

Os serviços complementares são operados por Veículos de Pequeno Porte – VPP ou micro-ônibus e possuem características específicas de gestão, com forma de delegação, remuneração e controle diferentes das linhas de ônibus operadas pelas demais empresas do STPP/RMR. Os VPP são operados por pessoas físicas que, através de um processo de licitação pública, obtiveram permissão para operar uma determinada linha no STPP/RMR definida pelo órgão gestor metropolitano ou municipal (2003), quando da regulamentação do transporte alternativo que operava até esta data de forma clandestina na RMR. Esse processo permite a substituição de linha, desde que haja um acordo entre o permissionário e o órgão gestor.

No Sistema Complementar essas integrações são realizadas em locais e em linhas pré-definidas pelo CTM, normalmente paradas, estações de metrô ou terminais, realizadas utilizando cartões eletrônicos, conforme sistemática definida no Manual de Operações do STPP/RMR.

2.5.2.1 - Tipos de Serviços e Linhas

O Sistema Complementar é constituído por diversos tipos de linhas operadas por ônibus ou micro-ônibus e classificadas de acordo com o tipo de serviço, quais sejam:

1. Serviço Convencional: serviço de transporte regular operado por ônibus ou micro-ônibus que constitui a maior parte das linhas do STPP/RMR e complementa os serviços básicos oferecidos pelo SEI. Essas linhas podem ser radiais, transversais, circulares ou integradas;

2. Operação Especial: serviço de transporte operado por ônibus, micro-ônibus estabelecido pelo CTM para situações específicas como eventos ou dias de demandas diferenciadas. As linhas deste serviço são denominadas linhas especiais;

3. Serviço Complementar: serviço de transporte regular operado por ônibus ou micro-ônibus que complementa os serviços convencionais e também interferem no sistema de transporte metropolitano. Ele atende as áreas com dificuldades de acesso ou com demandas que não justifiquem a criação de linhas do serviço convencional. As linhas deste serviço podem ser interbairros, alimentadoras ou intermunicipais;

4. Serviço Opcional: serviço com padrões mais alto de qualidade oferecido como opção ao serviço convencional. As linhas deste serviço são denominadas linhas opcionais; e

5. Serviço Local: aquele de caráter espacialmente restrito operado por ônibus, micro-ônibus ou VPP e que não pertence ao STPP/RMR, sendo constituído principalmente por parte de linhas intramunicipais, dos municípios da RMR, não consorciados com o CTM.

Ivana
Maria Ivana Vanderlei
Mat. 275

As características de cada tipo de linha são explicitadas no Manual de Operações do STPP/RMR.

2.5.2.2 - Comunicação Visual

A programação visual dos equipamentos e dos bens imóveis integrantes do STPP/RMR é de exclusiva competência do CTM, bem como, a comunicação visual dos ônibus, no interior e/ou exterior dos veículos, podendo ser veiculadas através de placas, adesivos ou pinturas.

As informações obrigatórias dos ônibus e a normatização da comunicação visual dos equipamentos do STPP/RMR estão estabelecidas no Manual de Operação do STPP/RMR.

2.5.3 - O STPP/RMR atual

O STPP/RMR é operado por 18 empresas privadas e uma pública (METROREC) conforme levantamento realizado em agosto de 2013. As 409 linhas de ônibus existentes realizam em média 28.197 viagens/dia, através de 2.788 veículos em operação. Transportam em média 2,07 milhões de passageiros por dia, dos quais 1,50 milhões são registrados, nos validadores dos ônibus, bilheterias dos terminais integrados e estações de metrô e os demais, embarcam no Sistema sem passar pelas catracas, como por exemplo, os idosos.

A maioria do STPP/RMR ainda é formada pelo Sistema Complementar, com o SEI representando apenas 65% do total de usuários. Operam no SEI 215 linhas de ônibus e duas de metrô, realizam 19.215 viagens/dia, com 1.489 veículos em operação.

As informações Operacionais e Financeiras das Linhas do STPP/RMR – 2012/2014, mês a mês, se encontram disponibilizados nos Volumes A e B que acompanham este anexo.

As linhas de metrô são operadas pela Companhia Brasileira de Trens Urbanos - Superintendência de Trens Urbanos do Recife - CBTU - STU/REC com 15 (quinze) trens na linha Centro e 07 (sete) trens na linha Sul transportando em média 200.000 (duzentos mil) e 80.000 (oitenta mil) passageiros por dia, respectivamente.

Atualmente, o funcionamento dos corredores estruturais, terminais de integração e rede de linhas previstas para o SEI pode ser assim resumido:

a) Corredor Metroviário Sul e sua extensão até o Cabo

Opera neste corredor o metrô da linha Sul que liga a Estação Recife a Estação de Cajueiro Seco.

Maria Ivana Vanderlei
Mat. 275

Para o trecho seguinte, de Jaboatão dos Guararapes (Estação de Cajueiro Seco) até o Cabo de Santo Agostinho deve início a operação com o Veículo Leve sobre Trilhos no primeiro semestre de 2013.

Em novembro de 2009 entrou em operação o Terminal José Faustino dos Santos localizado no Cabo de Santo Agostinho com a sua respectiva rede de linhas integradas, que possui ligação com o Terminal de Cajueiro Seco, através das linhas interterminais. Os terminais de Aeroporto, Cajueiro Seco e Tancredo Neves, anexos às respectivas Estações da Linha Sul do Metrô de mesma denominação, entraram em operação no período 2012/2013.

Os terminais de Largo da Paz e Prazeres, anexos às respectivas Estações da Linha Sul do Metrô de mesma denominação estarão em operação em 2014.

b) Corredor Metroviário Centro e seu Ramal Coqueiral / Rodoviária / Camaragibe

Atualmente é operado pelo metrô que liga Recife ao centro antigo do Município de Jaboatão dos Guararapes e Moreno e também aos municípios de Camaragibe e São Lourenço da Mata, através de linhas alimentadoras. Entretanto, parte das linhas que atendem ao corredor ainda pertence ao Sistema Complementar.

Encontra-se em operação os terminais integrados de Recife, Joana Bezerra, Afogados, Barro, Cavaleiro, Jaboatão dos Guararapes, TIP e Camaragibe, com as respectivas redes de linhas. Os terminais de Joana Bezerra e do Barro estão sendo ampliados para permitir a implantação da rede total de linhas previstas, substituindo parte das linhas do Sistema Complementar que operam no local.

Existe a previsão para entrada em operação, em 2014 do terminal de Santa Luzia anexo a Estação de Santa Luzia do metrô e Cidade da Copa, anexo à Estação Cosme e Damião do metrô.

c) Corredor da Av. Caxangá

Este corredor possui tratamento prioritário para transporte coletivo em quase toda sua extensão.

Atualmente, a maior parte das linhas que circulam pela Av. Caxangá pertence ao Sistema Complementar, embora existam as troncais radiais dos Terminais de Caxangá e de Camaragibe pertencentes ao SEI que também circulam por este corredor.

Joana
Maria Ivana Vanderlei
Mat. 275

Em 2014 será implementado neste corredor o Sistema de Transporte Rápido por Ônibus – TRO nos mesmos moldes do BRT (Bus Rapid Transit) existentes em Curitiba e Bogotá. Nesta ocasião este corredor operará com ônibus circulando em pista exclusiva do Centro do Recife até Camaragibe. Para isto no trecho compreendido entre a bifurcação da PE-05 com a PE-27 até o Terminal Integrado de Camaragibe o tráfego passará a ter prioridade para o transporte coletivo com a implementação de um corredor exclusivo de ônibus e a previsão de construção de uma via paralela para deslocamento do tráfego geral, no trecho do centro de Camaragibe.

Encontram-se em operação os terminais integrados de Camaragibe e da Caxangá com as respectivas redes de linhas.

Está previsto para este corredor Terminais de Integração do SEI situados na Cidade da Copa e na bifurcação com a IV e III Perimetrais. Nestes pontos as integrações serão realizadas em terminais fechados. No cruzamento com a II e I Perimetrais serão construídos pontos de troca, podendo existir outros pontos de troca onde à integração ocorrerá utilizando-se a bilhetagem eletrônica.

d) Corredor da Av. Norte

Apesar de não dispor das condições adequadas para um corredor do SEI, nele opera uma linha troncal radial do SEI que inicia sua operação no Terminal Integrado da Macaxeira. Este Terminal desempenha um importante papel estratégico para o SEI, pois se localiza numa alça da BR-101, IV Perimetral, e nele encontram-se linhas troncais perimetrais, que permitem a ligação entre o norte e sul da RMR. Além disso, possibilita a utilização do metrô, através de uma linha perimetral ligando-o à estação do Barro e uma interterminal com origem no Terminal de Integração de Camaragibe. Entretanto, as principais linhas do Corredor da Av. Norte ainda não estão operando no SEI e continuam como linhas do Sistema Complementar, prevista para integrarem com a implantação do Corredor do TRO e construção de dois terminais de integração, nos cruzamentos com a III e II Perimetrais, após 2014.

e) Corredor Presidente Kennedy / Anel Norte

Este corredor encontra-se implementado com de faixa exclusiva para os transportes coletivos. Também devendo ser construída uma via paralela à Av. Presidente Kennedy, Av. Transamazônica / Av. Brasília, formando um binário que será interligado por vias transversais, permitindo a partir dela, acessar a Av. Kennedy no ponto desejado, aliviando desta forma o tráfego geral e em especial de caminhões pela Av. Kennedy. Está em operação o Terminal Integrado Xambá, pertencente ao SEI, situado próximo ao cruzamento da Av. Presidente Kennedy com a III Perimetral.

Maria Ivana Vanderlei
Mat. 275

f) Corredor da PE-15

Neste corredor encontram-se em funcionamento as redes e os terminais integrados de Igarassu, Pelópidas Silveira (interseção da PE-22 com PE-15) e Terminal Milton de Oliveira Santos (Interseção da PE-15 com a II Perimetral) e em construção o Terminal Integrado de Abreu e Lima previsto para 2014.

Está sendo também construído, para este corredor a implementação do Transporte Rápido por Ônibus, denominado Corredor Norte/Sul, que interligará Igarassu ao Terminal Integrado do SEI em Joana Bezerra e ao Núcleo Central do Recife, tendo como ponto de bifurcação o Complexo Salgadinho em dois ramais, centro e Av. Agamenon Magalhães.

g) Corredor Av. Abdias de Carvalho

Neste corredor encontra-se em funcionamento a rede e o Terminal Integrado do TIP Está previsto para este corredor a transferência de linhas do Sistema Complementar para o SEI prevista para após 2014 no futuro terminal de integração do cruzamento com a IV Perimetral.

h) I Perimetral (Av. Agamenon Magalhães)

Neste corredor operam linhas troncais perimetrais do SEI, que interligam o Terminal da PE-15 ao de Joana Bezerra, além de várias outras linhas do Sistema Complementar. Neste corredor será implantado o sistema Transporte Rápido por Ônibus - TRO, com faixa exclusiva segregada, estações de transbordo no canteiro central, cobrança nas estações, para aumento de velocidade no corredor e conseqüentemente ganho de tempo de viagem para os usuários.

i) II Perimetral (Estrada Remédios/Real da Torre)

Este corredor está situado em área bastante adensada. Por ele circula uma importante linha troncal perimetral do SEI que funciona como ligação entre os terminais da PE-15 e o de Afogados ligando as regiões Norte a Sul da RMR, seccionando todos os corredores estruturais do SEI. Existe a previsão de implantação de Terminal de Integração na sua interseção com o Corredor da Av. Norte podendo existir, nas demais interseções com os outros corredores do SEI, pontos de integração que operarão através da bilhetagem eletrônica. Atualmente está em desenvolvimento projeto para implantação de faixa exclusiva para o transporte público.

Ivana
Maria Ivana Vanderlei
Mat. 275

j) III Perimetral (Av. Recife / San Martin)

Atualmente existe uma linha do SEI operando neste corredor. A partir da operacionalização do Terminal Integrado Tancredo Neves foi possível a operação de linha do SEI na III Perimetral. Também poderão existir nas demais interseções com os outros corredores do SEI, pontos de integração que operarão através da bilhetagem eletrônica.

k) IV Perimetral (contorno do Recife)

Neste corredor encontram-se importantes terminais do SEI em operação tais como o Terminal do Barro e o Terminal da Macaxeira, com as suas respectivas redes de linhas, inclusive as linhas troncais perimetrais do SEI. Para complementar a operação prevista para este eixo esta sendo construído o Terminal de Abreu e Lima, permitindo a ligação dos municípios das regiões Norte e Sul da RMR. Através deste corredor os municípios do Cabo de Santo Agostinho e Ipojuca, situados na região Sul da RMR, estão ligados aos municípios da região Norte através de Igarassu, Abreu e Lima, Itamaracá e Itapissuma pelo SEI. Também está sendo desenvolvido o projeto para tornar o corredor como Transporte Rápido por Ônibus, para o trecho Abreu e Lima- Cajueiro Seco.

As informações sobre os atuais terminais do SEI, com suas respectivas redes integradas, encontram-se no Anexo 2 – Caracterização dos Lotes. As redes previstas para os terminais que entrarão em operação até o final de 2014 estão apresentadas neste documento. Estas redes devem ser avaliadas e atualizadas na medida em que forem operacionalizadas, utilizando-se pesquisas operacionais com participação dos usuários.

A expansão do SEI para os demais corredores existentes no STPP deverá ocorrer a partir do momento em que os corredores atuais e o Sistema de Bilhetagem Eletrônica estiverem implantados. Para isto é necessário que sejam realizadas intervenções no sistema viário, construídos ou ampliados terminais integrados e implantadas infraestruturas nos pontos de integração, nas paradas de ônibus e nos acessos para pedestres aos terminais e corredores.

2.6 - Estrutura Tarifária do STPP/RMR

2.6.1 - Situação Atual do STPP/RMR

Compete ao CSTM fixar a tarifa a ser cobrada dos usuários, a partir de proposta do CTM, com base nos custos do STPP/RMR, do número de passageiros pagantes e eventuais subsídios, tudo conforme o disposto na Lei 14.474 de 16.11.2011, no Regulamento do STPP/RMR e respeitadas às disposições contratuais das empresas concessionárias/ permissionárias.

Maria Ivana Vanderlei
Mat. 275

O valor fixado para a tarifa deve suportar os seguintes custos:

I - remuneração dos concessionários e/ou permissionários;
II - manutenção do equilíbrio econômico-financeiro dos contratos de concessão;
III - despesas com o gerenciamento da bilhetagem eletrônica;
V - despesas com a gestão do STPP/RMR;
VI - despesas com a gestão dos Terminais de Integração do SEI, estações, paradas; e
VII - gratuidades e abatimentos.

A estrutura tarifária do STPP/RMR é composta de dois anéis tarifários denominados de 1° e 2° anel, com valores A e B, e mais duas tarifas especiais, uma tarifa para linhas locais, tarifa G, e uma tarifa transitória D. As tarifas são definidas em função das extensões das linhas, ou seja, no 1° anel tarifário (Tarifa A) as linhas possuem uma extensão máxima de 32,00km (ida e volta), 2° anel tarifário (Tarifa B) as linhas possuem uma extensão acima de 32,00km (ida e volta). A tarifa G é utilizada em linhas locais com extensão até 16,00 (dezesseis) km e a tarifa D criada para uma transição de futuras substituições de linhas diretas do Sistema Complementar para linhas do SEI.

O valor da tarifa G é menor que a do 1° Anel (A) e o da tarifa D situa-se entre as tarifas do 1° Anel (A) e do 2°Anel (B). Os anéis G e A representam a tarifa paga por aproximadamente 83 % dos passageiros do STPP/RMR.

A linha de metrô cobra atualmente R$ 1,60, inferior ao das demais linhas estruturadoras operadas por ônibus, pois é definida pela CBTU.

Atualmente as tarifas pagas pelos usuários do STPP/RMR são (junho/2013):

- Tarifa A: R$ 2,15
- Tarifa B: R$ 3,35
- Tarifa D: R$ 2,65
- Tarifa G: R$ 1,40

Com exceção do metrô, aos domingos as linhas de ônibus possuem reduções tarifárias, sendo cobrados os seguintes valores (junho/2013):

- Tarifa A: R$ 1,10
- Tarifa B: R$ 1,70
- Tarifa D: R$ 1,10
- Tarifa G: R$ 1,10

Existem no Sistema tarifas especiais cobradas nas linhas do Serviço Opcional ou com características diferenciadas das demais linhas do STPP/RMR. São elas (junho/2013):

Serviço Opcional (junho/2013):

- 042 - Aeroporto - Tarifa R$ 2,70

Maria Ivana Vanderlei
Mat. 275

- 072 - Candeias - Tarifa: R$ 4,10
- 160 - Gaibu/Barra de Jangada – Tarifa R$ 4,10
- 195 - Recife/Porto de Galinhas – Tarifa R$ 10,90

Tarifas Especiais (junho/2013):

- 191 - Recife/Porto de Galinhas (Nossa Senhora do Ó) - Tarifa R$ 7,40
- 194 - Cabo/Porto de Galinhas - Tarifa: R$ 4,10
- 196- Recife/Porto de Galinhas (IMIP)– Tarifa R$ 5,90.

2.6.2- Situação Futura do STPP/RMR

Com a licitação dos serviços do STPP/RMR a remuneração das concessionárias não mais dependerá da política tarifária praticada pelo órgão gestor.

2.6.2.1 - Estrutura Tarifária do SEI

Os valores tarifários das linhas do SEI levarão em conta, além das extensões e das características operacionais de cada uma delas, o deslocamento completo de ida e volta considerando o trecho alimentador e o troncal.

Os deslocamentos realizados através de linhas do Sistema Estrutural Integrado devem ter tarifas mais atrativas do que as definidas para o Sistema Complementar, de forma a motivar os usuários à utilização do SEI.

Quando da substituição de linhas do Sistema Complementar por linhas do SEI, as novas linhas devem oferecer aos usuários ganhos operacionais e sempre que possível também ganho tarifário.

Integração tarifária entre linhas do Sistema Complementar deverá praticar um valor imediatamente superior ao da maior tarifa envolvida.

Diante das mudanças previstas para o STPP/RMR está à definição de uma nova Política Tarifária e consequentemente uma nova estrutura tarifária.

Maria Ivana Vanderlei
Mat. 275

3.0 - Gestão do STPP

3.1 - Instrumentos Legais

A gestão do STPP/RMR está baseada nas leis de criação do CTM, nº 13.235 de 24 de maio de 2007, nº 17.033 de 19 de janeiro de 2005 e nº 5.553 de 04 de julho de 2007, os instrumentos aprovados pelo CSTM e/ou CTM, no Regulamento de Transportes, no Manual de Operações, além de normas específicas, como por exemplo, a da Avaliação da Qualidade do Desempenho das Concessionárias ou Permissionárias.

3.2 - Planejamento da Operação do STPP/RMR

O planejamento da operação dos serviços do STPP/RMR é definido pelo CTM por meio das Ordens de Serviço de Operação - OSO e dos Quadros de Horários - QH, que são elaborados utilizando pesquisas, dados obtidos pelo sistema de informações operacionais do CTM, relatórios da fiscalização, solicitações das comunidades e das operadoras.

3.2.1 - Padrões e Programação Operacional

O CTM estabelece a programação dos serviços a serem prestados pelas empresas operadoras, obedecendo a padrões operacionais mínimos especificados no Manual de Operação, entre os quais a ocupação máxima dos veículos para dias úteis, sábado e domingo e feriados e o intervalo máximo entre viagens.

A partir dos padrões operacionais estabelecidos pelo CTM as empresas operadoras podem elaborar propostas de novas programações para as linhas através de Quadros de Horários e Ordens de Serviço Operacional, que são avaliados e, quando cabíveis, aprovados pelo CTM. A nova programação das linhas é colocada à disposição dos usuários.

Algumas linhas com características diferenciadas possuem horários pré-estabelecidos, tais como as linhas especiais noturnas (Bacurau) e linhas sociais de baixa demanda, cujos intervalos serão definidos pelo CTM.

As linhas que atualmente operam com intervalos superiores aos estabelecidos aos padrões operacionais poderão de imediato não sofrer alteração, mas devem ser acompanhadas e avaliadas pelas Empresas Operadoras e CTM visando adequá-las, quando possível, a esses padrões.

O tipo de veículo é definido em função do número de passageiros transportados por dia e da classificação do serviço, não podendo numa mesma linha operarem veículos de tipos diferentes. Para linhas de maiores demandas ou com equipamentos especiais os tipos de veículos são definidos pelo CTM.

Maria Ivana Vanderlei
Mat. 275

Sempre que possível, quando uma linha apresentar a necessidade de um intervalo entre viagens inferior a 5 (cinco) minutos, os veículos deverão ser substituídos por outros de maior capacidade ou deve se implementar esquemas operacionais especiais, tipo viagens expressas ou semi-expressas, de modo a garantir o atendimento adequado aos usuários e a regularidade da linha.

3.3 - Controle da Qualidade dos serviços do STPP/RMR

Para controle da qualidade dos serviços do STPP/RMR o CTM dispõe de:

- Fiscalização dos serviços, diretamente pelo Consórcio;
- Vistoria dos veículos;
- Monitoração através de pesquisas sistemáticas;
- Sistema de Controle de Oferta de Serviços;
- Avaliação da Qualidade do Desempenho da Concessionária ou Permissionária; e
- Fiscalização Popular, através do acompanhamento e fiscalização dos serviços prestados pelas empresas operadoras, repassados pelos usuários ao CTM através da Central de Atendimento ao Cliente, personalizado ou Central telefônica, ou da Ouvidoria, disponível também para que possam fazer suas sugestões e reclamações.

3.3.1 – Fiscalização dos Serviços

A operação do STPP/RMR é monitorada, fiscalizada e controlada permanentemente pelo CTM, em conformidade com o estabelecido no RTPP/RMR, Manual de Operação, no Contrato de Concessão das empresas operadoras e nas demais normas legais e regulamentares aplicáveis.

A Fiscalização dos serviços do STPP/RMR é exercida através de agentes credenciados e identificados e tem como principal objetivo fazer cumprir os parâmetros técnicos – operacionais definidos pelo CTM, podendo determinar ações de caráter emergencial, com a finalidade de ajustar ou dar continuidade à execução dos serviços.

Constatadas quaisquer irregularidades perante disposições legais ou contratuais, a Fiscalização determinará a correção dos procedimentos adotados pela empresa operadora e/ou aplicará as sanções previstas no RTPP/RMR, no Manual de Operação do STPP/RMR, ou em normas legais e operacionais pertinentes.

A fiscalização e o controle da operação são efetuados através do acompanhamento do serviço executado pelas empresas operadoras por meio de monitoração remota, controle de terminal, visitas volantes, controle em ponto específico, controle de ponto de retorno e análise

Maria Ivana Vanderlei
Mat. 275

de relatórios emitidos pelo Sistema de Controle da Bilhetagem Eletrônica – SCBE e pelo sistema Simob.

No exercício de suas funções, a Fiscalização do CTM poderá constatar irregularidades na operação dos serviços prestados pelas empresas operadoras, bem como, algum descumprimento de cláusulas do Contrato de Concessão, Regulamento ou normas do CTM. Caso as irregularidades sejam passíveis de penalidades, a Fiscalização deve lavrar um Auto de Infração.

Dependendo da sua natureza ou tipicidade, as infrações podem ser constatadas pela Fiscalização em campo, nos seus arquivos ou nos documentos comprobatórios dos serviços, como também, no escritório.

Pelo descumprimento parcial ou total das obrigações estabelecidas no RTPP/RMR, no Manual de Operação, no Contrato de Concessão ou pela infração das normas legais e /ou regulamentares pertinentes ao STPP/RMR, o CTM poderá aplicar as sanções previstas no RTPP/RMR e Contrato de Concessão.

No caso de serem aplicadas penalidades às Concessionárias e/ou Permissionárias, as mesmas poderão encaminhar defesas para o CTM, cabendo recursos, em Primeira Instância, ao Diretor Presidente do CTM e em Segunda Instância, ao Conselho Superior de Transportes – CSTM, conforme procedimento descrito no RTPP/RMR.

3.3.2 - Vistoria

O CTM poderá, em qualquer época, nas garagens das empresas operadoras, nos terminais de subúrbio, terminais de integração, na sua sede ou em locais determinados pelo mesmo, realizar vistorias nos veículos e equipamentos obrigatórios utilizados para a operação do STPP/RMR.

As vistorias têm o objetivo de averiguar as condições de funcionamento dos veículos, segurança, higiene e aparência, bem como o atendimento às especificações e exigências do Código de Trânsito Brasileiro, do RTPP/RMR e Manual de Operação e de normas e instruções complementares pertinentes ao assunto, que determinarão a freqüência de vistorias por idade dos veículos, os cronogramas e todos os procedimentos que devem ser seguidos pelas empresas operadoras para vistoriar seus veículos.

A vistoria, quando programada, será realizada de acordo com um cronograma estabelecido em local, data e hora determinados pelo CTM, podendo ser executada diretamente ou a partir de estabelecimento credenciado e homologado pelo CTM.

Maria Ivana Vanderlei
Mat. 275

Para a vistoria programada, a concessionária deverá apresentar o veículo limpo e com um laudo assinado pelo engenheiro responsável pela sua manutenção, atestando que o veículo encontra-se dentro dos padrões exigidos pelo CTM.

Só poderá circular veículos no STPP/RMR com o competente Certificado de Vistoria válido, exceto em casos emergenciais com autorização expressa do CTM.

3.3.3 - Monitoração através de pesquisas sistemáticas

As pesquisas mais freqüentemente realizadas no STPP/RMR têm como objetivo coletar informações para subsidiar o planejamento e a monitoração do Sistema, o dimensionamento de linha, o controle da evasão e para conhecer a opinião dos usuários sobre o serviço de transportes.

Outros tipos de pesquisa frequentemente realizadas são: pesquisas de ocupação visual e pesquisa de origem/destino com cartão, análise dos dados do SCBE e pela CMO, que propiciam a elaboração de novas programações operacionais, adequando a oferta à demanda das linhas.

3.3.4 - Sistema de Controle de Oferta de Serviços

O principal instrumento de controle e monitoração do STPP/RMR é o Sistema de Controle da Bilhetagem Eletrônica – SCBE, com sua implantação em fase de conclusão. Ele permite acompanhar a operação através de equipamentos denominados validadores, instalados dentro dos ônibus que arquivam todas as informações sobre a operação, horários das viagens e passageiros transportados, que são transferidas para Sistemas Informáticos de Gestão nas garagens das empresas.

3.3.5 - Avaliação da Qualidade do Desempenho da Concessionária ou Permissionária

Compete ao CTM proceder a Avaliação da Qualidade do Desempenho Operacional das Concessionárias ou Permissionárias, visando garantir o bom funcionamento do STPP/RMR e acompanhar o desempenho das mesmas, para que sejam atendidas as condições mínimas administrativas, financeiras e operacionais dos instrumentos contratuais firmados com as empresas operadoras, existentes no STPP/RMR.

Em função do resultado encontrado na Avaliação de Desempenho, os contratos poderão ser cancelados ou renovados pelo período de tempo previsto no Contrato de Concessão.

A Avaliação de Desempenho dar-se-á através de um sistema de pontuação com periodicidade semestral, abrangendo os períodos de janeiro a junho e de julho a dezembro de cada ano, o que propicia aos operadores a possibilidade de correção das falhas encontradas.

Maria Ivana Vanderlei
Mat. 275

Os atributos que servem como inputs para o Sistema de Avaliação de Desempenho das empresas operadoras e que servirão para avaliá-las são os seguintes: Confiabilidade, Segurança, Adequabilidade e Relacionamento com o Cliente. As informações serão coletadas mensalmente e obtidas através de médias aritméticas ponderadas dos valores de cada atributo, no semestre objeto da avaliação conforme procedimentos descritos no Manual de Operação.

3.4 - Controle Operacional do STPP/RMR

O Controle Operacional do STPP/RMR é realizado pela Fiscalização já tratada no item 3.3.1 deste documento e através do Sistema Inteligente de Mobilidade para Operação do Transporte Público – Simob-TP, que tem como objetivo melhorar a eficiência e o desempenho do planejamento, da gestão e da fiscalização do STPP/RMR, através do uso de tecnologia moderna de informação e comunicação.

O Simob-TP agrega um conjunto de dispositivos embarcados nos ônibus, presentes em terminais e estações dos corredores do Transporte Rápido por Ônibus - TRO e no Centro de Monitoramento da Operação - CMO, links de comunicação fixos e móveis e softwares necessários, conforme especificado no Regulamento e Manual de Operação.

Os dispositivos embarcados nos ônibus do STPP/RMR encontram-se detalhados no Manual de Operação e serão operados e mantidos pela Concessionária ou Permissionária.

Todos os equipamentos embarcados nos ônibus, nos terminais de integração e estações dos corredores do TRO, integrantes do Simob – TP devem ser interoperáveis e de compatibilidade permanente com os sistemas do CMO. Devem, também, serem adequados para operar nas condições encontradas nos veículos onde estão instalados, devendo respeitar as condições de temperatura, corrente, tensão, umidade, entre outros, além das variações na partida e no desligamento da ignição.

Entende-se por interoperável e de compatibilidade permanente quando a comunicação se dá na especificação de protocolo da última versão disponibilizada pela Diretoria de Tecnologia da Informação - DTI - do CTM.

A operação do Simob - TP se dará das seguintes formas:

I- descentralizada, pelo uso de tecnologias de acesso móvel aos dados do sistema; e

II- a partir do CMO, para a obtenção das informações necessárias à operação do STPP/RMR e o atendimento das demandas de governo relacionadas à gestão pública, integrando-se as medidas de defesa social e ao controle do trânsito.

O CMO deve acessar todos os dados e sistemas que permitam o total controle e

Maria Ivana Vanderlei
Mat. 275

processamento dos dados operacionais do STPP/RMR, utilizados para a gestão, planejamento e fiscalização.

A Concessionária e Permissionária ficam obrigadas a fornecer, a pedido do CTM, todas as informações técnicas sobre os sistemas contratados para integrar o Simob - TP e suas tecnologias, colaborando com as evoluções e integrações necessárias para o pleno funcionamento do mesmo.

O Simob - TP - tem a seguinte composição:

I - Sistema de Controle da Bilhetagem Eletrônica - SCBE, pela sua importância e especificidade será tratado no Regulamento e Manual de Operação do STPP/RMR.

II - Sistema de Monitoramento da Operação - Simop/STPP, responsável pela gestão da circulação dos veículos em operação, pela intervenção para correção de anormalidades e reprogramação da linha, será utilizado principalmente a partir do Centro de Monitoramento da Operação - CMO.

III - Sistema de Informações ao Cidadão tem como objetivo informar aos usuários do STPP/RMR, as previsões de horários e os melhores itinerários para que o mesmo se desloque de um ponto ao outro na RMR.

A gestão e operacionalização do Simop/STPP é atribuição do CTM, a partir das informações obtidas do dispositivo embarcado nos veículos em operação e dos softwares de monitoramento, de acordo com o Manual de Operação. O Simop/STPP tem como objetivo promover a elevação da eficiência do transporte público ofertado à população em termos de regularidade, confiabilidade e maior acesso as informações pelos usuários.

3.5 - Controle Financeiro do STPP/RMR

Para a utilização dos serviços de transportes os usuários pagam as tarifas definidas pelo CSTM em dinheiro, cartões eletrônicos ou através de outros meios que vierem a ser instituídos pelo CTM, que constituem a receita do STPP/RMR.

O pagamento em espécie feito pelos usuários do STPP/RMR é recebido pelas empresas operadoras no interior dos veículos, estações ou terminais, enquanto que os cartões eletrônicos são vendidos diretamente pelo CTM ou por empresas por ele contratadas para a comercialização.

O gerenciamento dessas receitas do STPP/RMR será realizado pelo CTM através de uma Conta Gráfica das Receitas do STPP/RMR, de acordo com o Manual de Operação.

Maria Ivana Vanderlei
Mat. 275

São receitas da Conta Gráfica das Receitas do STPP/RMR:

I. A tarifa paga em espécie pelos usuários nos ônibus, Terminais do SEI ou nas Estações do TRO.
II. Os numerários representados pelo valor global de passagens estudantis, vales-transporte e vales inteiros, comercializados pelo CTM e recebidos pelas concessionárias do STPP/RMR. Estes valores serão repassados de cada conta especifica administradora dos vales-transporte, dos vales-inteiros e dos passes estudantis para Conta Gráfica das Receitas do STPP/RMR.
III. Receitas extratarifárias;
IV. Transferências dos sócios do CTM a título de subsídio aos usuários ou para fazer face às despesas de custeio do STPP como: os custos de manutenção dos terminais, miniterminais e paradas, despesas com os sistemas inteligentes e bilhetagem eletrônica.

Constituem despesas da conta gráfica do STPP/RMR o pagamento das concessionárias e permissionárias pelo serviço prestado, a Taxa de Gestão do Sistema, os custos de manutenção dos terminais, terminais de integração, estações e paradas, despesas com os sistemas inteligentes e bilhetagem eletrônica.

3.5.1 - Sistema de Controle da Bilhetagem Eletrônica – SCBE

O Sistema de Controle da Bilhetagem Eletrônica - SCBE - gerido pelo CTM tem como principal objetivo dotar o STPP/RMR de um sistema integrado de pagamento de passagens e de um controle de acesso aos usuários, visando permitir o acompanhamento da realização das viagens e o controle da receita do STPP/RMR, identificando os tipos de pagamento das passagens, mediante registro nos validadores e nas catracas dos usuários que utilizam o Vale-Transporte, Gratuidades, Passe Estudantil e Vale Comum, assim como a compra antecipada de passagens. Igual ao Regulamento.

O SCBE terá os equipamentos (hardware) e os programas (software) cumulativamente instalados pelas concessionárias do STPP/RMR nos veículos e locais determinados pelo CTM.

3.5.2 - Gratuidades e Abatimentos

Os estudantes têm 50% de desconto no preço da tarifa através do cartão eletrônico conhecido com VEM Estudante.

Existem algumas categorias de usuários que possuem direito à gratuidade. São elas:

Ivana
Maria Ivana Vanderlei
Mat. 275

I- Idosos (acima de 65 anos);
II- Crianças até 6 (seis) anos;
III- Livre acesso (pessoas com deficiência);
IV- Policiais militares, limitados em dois por veículo;
V- Os fiscais da Delegacia Regional do Trabalho – DRT; e
VI- Empresa Brasileira de Correios e Telégrafos.

Os usuários que possuem o direito a gratuidade apresentam bilhetes, cartões ou carteiras específicas, conforme regulamentação do CTM, entre os quais:

- Carteira de Identidade ou outro documento de identificação com foto – para os idosos
- VEM Criança
- Carteira de Livre Acesso – para pessoas com necessidades especiais; e
- Cartão Eletrônico da DRT;

3.6 - Remuneração da Concessionária

As Concessionárias serão remuneradas pelo CTM, diariamente, em face da utilização do Vem Trabalhador pelos usuários, com base em média histórica de passageiros transportados devidamente atestada pela área técnica competente do órgão gestor, e, quinzenalmente, quando se tratar de Vem Estudantil e Vem Comum, de acordo com cada lote de linhas, em função da prestação dos serviços do STPP/RMR, tendo como parâmetro o Preço de Remuneração ao Operador - PRO, valor monetário proposto pelo Licitante Vencedor para remunerá-lo, por Passageiro Transportado Equivalente com Integração - PTEI, em contrapartida à prestação dos serviços do STPP/RMR, de acordo com o estabelecido no seu Contrato de Concessão, neste Regulamento e no Manual de Operação.

A Concessionária responde por todas as despesas decorrentes da prestação do serviço, incluindo as relativas ao pessoal, operação, manutenção do veículo, pagamento de tributos, encargos sociais, trabalhistas, previdenciários e seguro de responsabilidade civil contra danos causados a terceiros, além dos prejuízos causados ao Poder Público e aos usuários do serviço ou a terceiros.

A remuneração devida pela prestação dos serviços em função da utilização do Vem Trabalhador pelos usuários, será objeto de ajuste pela área técnica responsável, tendo como referência o quantitativo real apurado no período, processado a cada 10 (dez) dias úteis após o fechamento de cada quinzena.

Maria Ivana Vanderlei
Mat. 275

O pagamento da tarifa em espécie na catraca dos coletivos pelos passageiros, será considerado como efetiva remuneração e computado para efeitos de ajustes conforme previsto no parágrafo anterior.

3.6.1 - Reajuste e Revisão da Remuneração da Concessionária

O valor da Remuneração ao Operador (PRO) será reajustado anualmente pelo Índice de Preço ao Consumidor- IPCA, divulgado pelo Instituto Brasileiro de Geografia e Estatística – IBGE ou a qualquer momento desde que surja um fato extraordinário, sempre com o objetivo de manter o equilíbrio econômico-financeiro do Contrato de Concessão, em conformidade com o estabelecido no artigo 65 da Lei Federal n. 8.666/93 e artigos 9, 10 e 11 da Lei Federal n. 8.987/95, no Contrato de Concessão.

A cada quatro anos, não se realizará o reajuste previsto no item anterior, procedendo-se à repactuação do preço contratado, a qual visará à adequação aos novos preços de mercado dos insumos utilizados pelo particular delegado na operação do STTP/RMR.

A repactuação se fará através da demonstrarão analítica da variação dos preços dos componentes dos custos verificada entre o momento inicial do contrato e o momento de cada repactuação, com base na planilha apresentada na licitação, subtraindo-se do percentual resultante as variações no preço do contrato decorrentes da incidência dos reajustes anuais e repactuações anteriores. Este procedimento tem como finalidade manter o equilíbrio econômico-financeiro deste Contrato de Concessão, em conformidade com o estabelecido no art. 65, da Lei Federal nº 8.666/93, nos arts. 9º, 10 e 11, da Lei Federal nº 8.987/95.

Para a revisão dos custos de cada Concessionária será adotada a metodologia descrita no Manual de Operação.

3.7 - Remuneração da Permissionária do STPP/RMR

A permissionária dos serviços complementares ou locais será remunerada através da receita arrecadada proveniente da tarifa paga pelo usuário e da receita do resgate dos créditos recebidos no VEM Trabalhador e VEM Estudante registrados na catraca e acompanhados pelo Sistema de Controle da Bilhetagem Eletrônica – SCBE, tudo de acordo com os índices operacionais definidos pelo Regulamento e Manual de Operação e pela efetiva realização do serviço, respeitado o equilíbrio econômico-financeiro do contrato.

O CTM poderá utilizar o Serviço Complementar para o atendimento aos usuários através de linhas sociais, remunerando o permissionário pelo produto entre o custo/km,

definido pelo CTM, através de uma planilha de custos específica para cada tipo de veículo e a quilometragem por ele rodada em cada linha no período de apuração.

3.8 - Comunicação e Divulgação

Os principais mecanismos de comunicação com os usuários utilizados pelo CTM são os seguintes:

1. Atendimento personalizado aos usuários, com equipe de técnicos especializados em atendimento ou através de sua Ouvidoria;
2. Atendimento telefônico através da Central de Atendimento ao Cliente - CAC do CTM;
3. Atendimentos realizados diretamente pelas empresas operadoras, através de seus Serviços de Atendimento aos Clientes;
4. Reuniões nas comunidades ou na sede da Empresa;
5. Ofícios e solicitações diversas;e
6. Informações via SMS, internet, etc.

Todos os canais de comunicação devem ser utilizados pelo CTM principalmente com os seguintes objetivos:

1. Informar aos usuários sobre as alterações operacionais a serem implantadas no STPP/RMR;
2. Apresentar aos usuários as modificações operacionais propostas, para sugestões ou ajustes; e
3. Justificar o não acatamento ao seu pleito ou informar o atendimento.

3.8.1 - Comunicação Visual

A programação visual dos equipamentos e dos bens imóveis integrantes do STPP/RMR será de exclusiva competência do CTM.

Os veículos e equipamentos existentes no STPP/RMR possuem uma Comunicação Visual padronizada segundo especificações do CTM, constantes no Manual de Operação e sua utilização por parte das empresas operadoras é obrigatória, podendo ser veiculadas através de placas, adesivos ou pinturas, no interior e/ou exterior dos veículos.

Igualmente ao que ocorre com a frota e equipamentos, também existe uma Comunicação Visual para o mobiliário urbano determinada pelo CTM.

3.8.2 - Campanhas e Eventos

Para divulgar as informações de interesse dos usuários do STPP/RMR serão utilizados mecanismos, desenvolvidos pelo CTM, como cartazes, folders informativos, carro de som, internet, celular e demais meios de comunicação.

O CTM realizará campanhas educacionais visando contribuir para a utilização adequada do STPP/RMR, como também, campanhas informativas dirigidas aos usuários.

4.0 - Serviços Acessórios do STPP/RMR

Serviços acessórios e complementares são aqueles que podem ser suprimidos, sem que isto descaracterize ou afete o objeto da concessão do STPP/RMR.

Os serviços oriundos de atividades acessórias relacionadas ao serviço de transporte público serão licitados e administrados pelo CTM, obedecendo às normas estabelecidas nas Leis Federais 8.666/93 e 8987/95 e não poderá acarretar prejuízo à execução dos Contratos de Concessão e Permissão existentes no STPP/RMR.

Qualquer prestação de outros serviços públicos municipais ou atividades alternativas, acessórias, complementares ou relacionadas a projetos associados aos serviços do STPP/RMR terá de obter autorização expressa e prévia do CTM.

As receitas oriundas da exploração de atividades alternativas, acessórias, complementares ou relacionadas a projetos associados aos serviços do STPP/RMR, pertencem ao Poder Concedente, cabendo a ele a implementação dos empreendimentos pertinentes, para a utilização na melhoria dos serviços do STPP/RMR e na modicidade tarifária.

4.1 - Comercialização de Espaços Publicitários

A exploração comercial de espaços publicitários, por se tratar de receita acessória, será regulada por licitação própria a ser realizada pelo CTM.

Dentre os espaços publicitários que serão licitados destacam-se: 1. A exploração econômica dos espaços publicitários em abrigos; 2. Espaços de out-bus; 3. A mídia indoor nos ônibus (TV ou cartaz).

O CTM poderá explorar os espaços em veículos, paradas, terminais, miniterminais, cartões eletrônicos ou qualquer espaço que seja economicamente viável sua exploração por particular, sempre precedido por licitação pública.

4.2 - Comercialização de créditos eletrônicos do SCBE

Com a descentralização dos Postos de Comercialização de Créditos Eletrônicos do SCBE o CTM poderá licitar a exploração da comercialização dos referidos créditos.
